## SUMMARY

Full-stack developer and fourth-year CSE student with hands-on experience building web applications using Spring Boot, Thymeleaf, and React. Comfortable across the stack, from designing REST APIs and relational/NoSQL data models to shipping deployed, documented software following Agile practices with Jira. Strong foundation in Data Structures & Algorithms, with an active interest in software optimization, automation, and applied data science / AI.

## EDUCATION

**Southeast University** *June 2023 – June 2027 (Expected)*

Bachelor of Science in Computer Science and Engineering (CSE) | CGPA: 3.86 / 4.00

*Relevant Coursework: Advanced Java, Web App Development, Image Processing, Information System Design*

HSC (2022) — GPA 5.00/5.00 | SSC (2020) — GPA 5.00/5.00

## TECHNICAL SKILLS

- **Languages:** Java, JavaScript, C/C++, Python, MySQL, NoSQL
- **Frameworks & Libraries:** Spring Boot, React, Tailwind CSS, HTML/CSS, Pandas, NumPy, Matplotlib
- **Core Competencies:** Data Structures & Algorithms (DSA), REST API Design, OOP, Web Application Development, Microservices, Spring Security
- **Tools & Cloud:** Docker, Git, GitHub, Postman, Jira, MongoDB

## PROJECTS

**Easy-ToLet — Rental Property Platform** *Spring Boot, Thymeleaf, MongoDB, React*

Live: [easy-tolet.onrender.com](https://easy-tolet.onrender.com)

- Built and deployed a full-stack rental property platform where users can browse, list, and request to-let properties, developed as a complete Information System Design (ISD) capstone project.
- Delivered full project documentation, including SRS and UML diagrams (use case, class, sequence, and ER diagrams), and managed development using Agile sprints tracked in Jira.
- Implemented backend services with Spring Boot and MongoDB, server-rendered views with Thymeleaf, and explored React for frontend enhancements as part of ongoing React learning.
- Deployed the live application on Render, handling environment configuration and production database connectivity.

**Car & Car Service Center Management System** *Spring Boot, Thymeleaf, HTML, CSS, Java*

- Engineered a full-stack car service management platform to handle service operations, customer records, and appointment scheduling.
- Built a responsive, intuitive frontend with Thymeleaf and CSS for smooth user interaction.
- Optimized backend request handling and data processing for fast, reliable service management.

**Library Management Web App** *Java, Spring Boot, Thymeleaf, HTML, CSS*

- Built a Java-based web system for digital cataloging and book tracking, with secure user authentication and efficient database operations.
- Designed a clean, user-friendly interface for managing book records, issue/return workflows, and user roles.

**Digital Artwork Auction & Management System** *Java, JavaFX, CSS*

- Developed a desktop-based auction and management system in JavaFX for handling artworks, bids, auctions, and user accounts.
- Designed a modern, user-friendly interface for artists, buyers, and administrators, with real-time bidding logic and secure data handling.

**Portfolio Website** *Spring Boot, Thymeleaf, HTML, CSS*

- Developed a personal portfolio website using Spring Boot and Thymeleaf to showcase projects, skills, and achievements.
- Designed a responsive, clean interface with HTML and CSS for a smooth browsing experience across devices.
